

Scripted Language

Key Point	RE of PMAB	Script/Approach
Be patient/Listen	Reassure	Listen more than you speak. Let them vent a little frustration – there is probably some useful information being communicated. <ul style="list-style-type: none"> • <i>“May we speak?”</i>
Show that you care	Reassure	<ul style="list-style-type: none"> • <i>“I’m sorry that you are so upset. I will do everything I can to help you.”</i>
Stay positive	Reassure/Reorient	Use positive words like comfort, comfortable, safe, and safety <ul style="list-style-type: none"> • <i>“How can I help you feel more comfortable?”</i>
Remain Calm	Reassure/Reorient	Be supportive and remember your para-verbals (body language, eye contact, volume, tone, cadence of your speech) <ul style="list-style-type: none"> • <i>“You are in a safe place, we are here to help”</i>
Focus on the need not the behavior	Reorient/Redirect	Agitation is an expression of unmet needs (physical : unmanaged symptoms, hunger, fatigue, pain and emotional : safety and security). Meet needs whenever possible. When it’s not possible be firm and mannerly: <ul style="list-style-type: none"> • <i>“That is not an option, but here are the options...”</i>
Do not tolerate abuse Don’t worry alone	Redirect	Know what you are walking into. Bring in extra support or disengage if you realize more support is needed (e.g. other nursing staff, security). Use a team approach/show of support if the patient is agitated. If the situation is escalating, disengage and call a Pre-Code Gray or Code Gray if violence seems more imminent. <ul style="list-style-type: none"> • <i>“I’m going to step out and get us more help.”</i>
